House File 4180 makes satellite broadband providers eligible to apply for and receive grants to defray the cost of delivering broadband service to unserved areas under the state's Border-to-Border Broadband Development Grant Program.

Grants would fund up to 50 percent of the cost of satellite broadband equipment—a satellite dish or modem—installed at a user location. The service must support broadband speeds of at least 25 megabits per second download and 3 megabits per second upload.
